

Experiment 28: Pull Latest Changes from a GitHub Repository

Aim

To pull the latest changes from a GitHub repository and update the local repository.

Requirements

- Git bash
- GitHub account
- VS Code (or any text editor)
- Cloned GitHub repository
- Collaborator with access to the repository

Procedure

Step 1: Clone the Repository

- Clone the repository if it is not already available locally.

Screenshot: Repository cloned.

```
srinidhi@Srinidhis-Laptop ~ % cd desktop
srinidhi@Srinidhis-Laptop desktop % git clone https://github.com/Sriarevalagan23/Test-repo-fork
Cloning into 'Test-repo-fork'...
remote: Enumerating objects: 79, done.
remote: Counting objects: 100% (79/79), done.
remote: Compressing objects: 100% (68/68), done.
remote: Total 79 (delta 5), reused 76 (delta 5), pack-reused 0 (from 0)
Receiving objects: 100% (79/79), 1.41 MiB | 132.00 KiB/s, done.
Resolving deltas: 100% (5/5), done.
srinidhi@Srinidhis-Laptop desktop % cd test-repo-fork
srinidhi@Srinidhis-Laptop test-repo-fork %
```

Step 2: Collaborator Makes Changes

- Ask a collaborator to modify a file and push the changes to GitHub.

Screenshot: Updated repository on GitHub.

The screenshot shows the GitHub interface for a repository named 'Test-repo' (Public). At the top, there's a 'Watch' button with a count of 0. Below the repository name, there's a navigation bar with 'main' selected, '1 Branch', and '0 Tags'. A search bar 'Go to file' and buttons for 'Add file' and 'Code' are also present. The main content area displays a list of files and folders with their commit history:

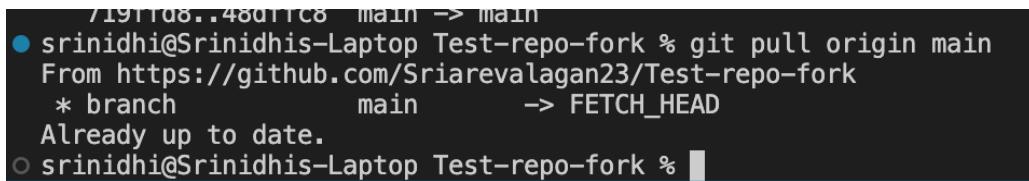

File/Folder	Commit Message	Time
.claude	Initial commit	last week
.vscode	Initial commit	last week
assets	Initial commit	last week
scripts	Initial commit	last week
src	Initial commit	last week
.gitignore	Initial commit	last week
AGENTS.md	module 1 added	33 minutes ago
CLAUDE.md	Initial commit	last week
LICENSE	Initial commit	last week
README.md	Updated README in feature branch	last week

Step 3: Pull the Latest Changes

Bash

```
git pull origin main
```

Screenshot: Terminal showing successful pull.

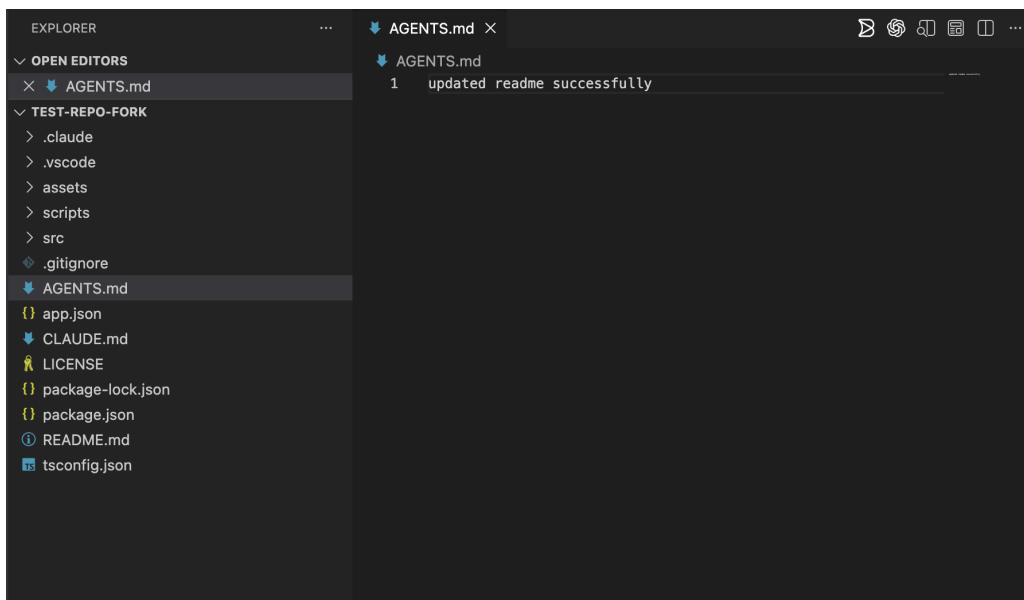

```
7191f08..48d11c8  main -> main
● srinidhi@Srinidhis-Laptop Test-repo-fork % git pull origin main
From https://github.com/Sriarevalagan23/Test-repo-fork
 * branch          main          -> FETCH_HEAD
Already up to date.
○ srinidhi@Srinidhis-Laptop Test-repo-fork %
```

Step 4: Verify the Changes

- Open the updated file and confirm that the collaborator's changes are present.

Screenshot: Updated file in the local repository.

Result

Successfully pulled the latest changes from GitHub and updated the local repository with the collaborator's changes.
