

Experiment 29: Create a Branch and Merge Using a Pull Request

Aim

To create a new branch, implement a login function, and merge the changes into the main branch using a Pull Request.

Requirements

- Git installed
- GitHub account
- VS Code (or any text editor)
- Internet connection
- GitHub repository

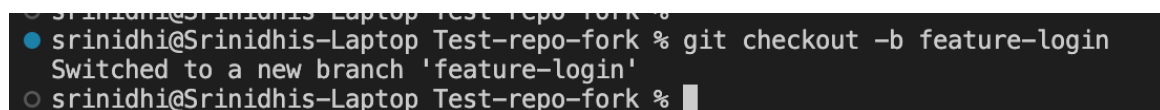

Procedure

Step 1: Create a New Branch

Bash

```
git checkout -b feature-login
```

Screenshot: Branch created.

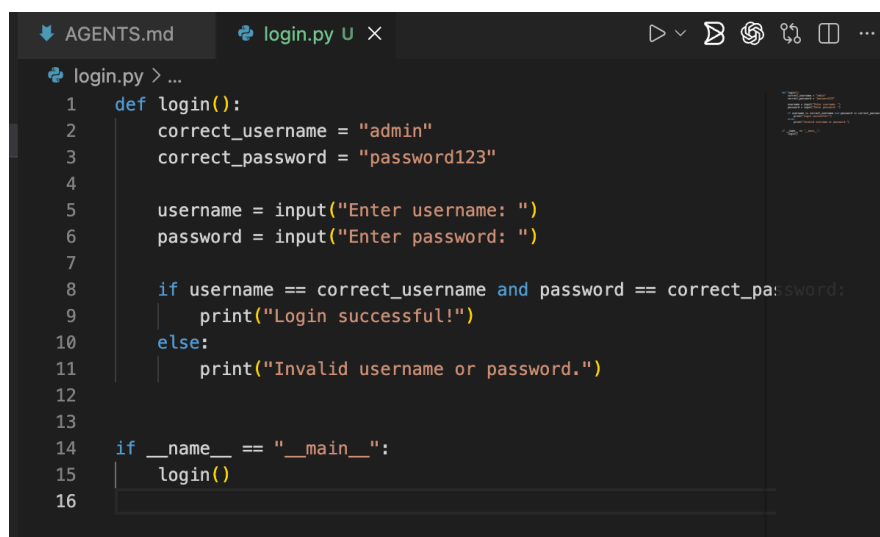

```
srinidhi@Srinidhis-Laptop Test-repo-fork % git checkout -b feature-login
Switched to a new branch 'feature-login'
srinidhi@Srinidhis-Laptop Test-repo-fork %
```

Step 2: Create login.py

- Create a file named login.py.
- Add a simple login function and save the file.

Screenshot: login.py file.

```
login.py > ...
1  def login():
2      correct_username = "admin"
3      correct_password = "password123"
4
5      username = input("Enter username: ")
6      password = input("Enter password: ")
7
8      if username == correct_username and password == correct_password:
9          print("Login successful!")
10     else:
11         print("Invalid username or password.")
12
13
14 if __name__ == "__main__":
15     login()
16
```

Step 3: Commit and Push Changes

Bash

```
git add .  
git commit -m "Added login function"  
git push origin feature-login
```

Screenshot: Terminal showing successful push.

```
srinidhi@Srinidhis-Laptop Test-repo-fork % git add .  
srinidhi@Srinidhis-Laptop Test-repo-fork % git commit -m "login"  
[feature-login a14cafb] login  
1 file changed, 15 insertions(+)  
create mode 100644 login.py  
srinidhi@Srinidhis-Laptop Test-repo-fork % git push origin feature-login

remote: Create a pull request for 'feature-login' on GitHub by visiting:  
remote:   https://github.com/Sriarevalagan23/Test-repo-fork/pull/new/feature-  
ogin  
remote:  
To https://github.com/Sriarevalagan23/Test-repo-fork  
* [new branch]   feature-login -> feature-login
```

Step 4: Create and Merge a Pull Request

- Create a Pull Request from **feature-login** to **main** on GitHub.
- Review and merge the Pull Request.

Screenshot: Pull Request created and merged

Feature login #4

 **Sriarevalagan23** wants to merge 2 commits into **Santhosh-1307:main** from **Sriarevalagan23:feature-login** 

Conversation 0 Commits 2 Checks 0 Files changed 2

 **Sriarevalagan23** commented **now** Collaborator 

accept the merge

 **Sriarevalagan23** added 2 commits **19 minutes ago**

  **Done** 48dff8

  **login** a14cafb

 **Pull request successfully merged and closed**

You're all set — the **feature-login** branch can be safely deleted. If you wish, you can also delete this fork of Santhosh-1307/Test-repo in the [settings](#).

Delete branch

Result

Successfully created the **feature-login** branch, implemented a login function, pushed the changes, and merged them into the **main** branch using a Pull Request.
